EXPERIENCE

FRONT END DEVELOPER

Jun 2017 - Jul 2017
(3 week contract)

BLUEPRINT DESIGN COMPANY

Creating website redesign mock up for an existing client, also assisting in front end work required for deadline.

FRONT END DEVELOPER

Jun 2015 - May 2017

AKERO LABS

Creating and improving various features within the software, developing the front end for new features.

Developing the front end for a new responsive and printable reporting dashboard which displayed lead, activity and graph data to users. The feature included custom drag and drop widgets which were resizable and customizable.

Responsible for the design and development for new responsive layouts and themes within the system.

Fixing front end issues including hotfixes reported through Jira, cross browser, responsive and testing of new and existing features, creating bug tickets when required.

Developed the new front end for edurank.net, supporting in the implementation of version 2 of the Akero software.

Working with the marketing team to update and improve areas of the website and blog, creating a showcase page of existing landing pages for Net Natives and Akero.

Technologies: Angular 1.x, HTML5 / Jade, Sass / CSS, Javascript, Various Javascript Libraries, AJAX, jQuery, Gulp, Npm, Bower, Git, Jira, Bitbucket, MongoDB, Photoshop, Sketch.

Enjoyed time here however decided to leave as was looking for new challenges and responsibilities in order to progress career and professional growth. Since this time I have created a number of side projects using relevant technologies.

DESIGNER, DEVELOPER

Jan 2013 - Jun 2015

INDEPENDENT GAMES & WEB DEVELOPMENT

During this time I created a number of independent games, the larger projects are listed on my portfolio under 'Games & Apps' where you can find more details about the projects including trailers for the games themselves.

www.mattpilcher.co.uk/portfolio.html
